

CARNAUBEX 442

CARNAUBA WAX WATER EMULSION

GENERAL:

CARNAUBEX 442 is a brown water emulsion of carnauba wax further dilutable in water. Its characterized by a low viscosity and accordingly particularly suitable to obtain very good effect, for example, on treated leather: pull-up, nice and voluminous hand feel. **CARNAUBEX 442** has, furthermore, restructuring and hydro-repellent features.

CARNAUBEX 442 is manufactured by using non-ionic emulsifiers that do not interfere with the systems here is added, being also stable even at high dilutions.

PHYSICAL-CHEMICAL CHARACTERISTICS:

Appearance		LIQUID
Odor		CHARACTERISTIC
Color		BROWN
pH		3,5 +/- 1
VOC	%	ABSENT
Solid content	%	45 +/- 2
Storage		IF KEPT CORRECTLY: 6 MONTHS – PLEASE STIR PRIOR OF USAGE

STABILITY AND STORAGE:

Being based upon a vegetal origin wax, **CARNAUBEX 442** has to be used within 6 months from manufacturing date in order to exploit the maximum efficiency.

Please store between + 5 and + 30°C in well closed and possibly full drums. Do not leave for long time the product in almost empty vessel, if this is the case is better to pour it in smaller containers.

USAGE AND APPLICATION:

CARNAUBEX 442 can be used as is just previously diluted with water. The dilution percentage depends on the kind of desired effect and the type of leather to be treated.

CARNAUBEX 442 is usually sprayed upon the leather during finishing process, or can be also combined with other water emulsions to obtain a specific feeling effect.

IMBALLI DISPONIBILI:

25 Kg – 50 Kg – 120 Kg– 200 Kg drums; Tanks (IBC) of 1000Kg
